What is a Climate Resiliency Center?

The Villages at Cabrillo is planning on pursuing a grant opportunity in August to secure the necessary funding to develop the new gymnasium and climate resiliency center on the Villages at Cabrillo. The 37,000-square-foot facility will have a large gymnasium with an interior running track, meeting rooms, and administrative offices and will be located at the site of the bungalow buildings on the west side of San Gabriel Avenue at the intersection with Willard Street. The Community Climate Resiliency Center will serve the dual role of providing a healthy recreational facility for residents of the Villages of Cabrillo while being a safe shelter during disaster and climatic events. As part of this community-led planning process, help us determine the future programming and design of the Community Climate Resiliency Center!

Please take a moment to fill out this short survey.

What activities would you like to do inside the gymnasium? (Choose three)

- Basketball
- Pickleball
- Volleyball
- Badminton
- Futsal
- Tennis
- Handball
- Dodgeball
- Running

What other programming should the new facility support? (Choose one)

- Meeting/Classrooms
- Administration Offices
- Occupational Therapy Studio
- After-School Program
- Arts & Crafts Studio

Are there any other programming the new facility should support?
